

March 31/21

Six Nations Ventures job, involving unloading trucks in a remote log yard north of Wonowon has stopped for the spring break up.

Later on, there should be work loading trucks to transport timber onto the Canfor mill in Fort St. John. Again, Canfor has been very considerate in providing us work. They indicated that we organized the logs decks very well.

Note also, that we have not received any notice from Louisiana Pacific Canada Ltd., to return to work in their yard, but it appears they are not willing to work with us, as they are currently taking wood into their yard without calling us. In fact, they have not communicated with us at all, since shutting down and have not returned any of our requests to discuss.
